

EC DECLARATION OF CONFORMITY

Manufacturer

Phase 3 Connectors Limited
61 Nasmyth Road
Southfield Industrial Estate
Glenrothes
Fife
Scotland
KY6 2SD

Product Description:

This declaration of conformity made under the requirements of the Low Voltage Directive 73/23/EEC, relates to Powersafe single pole high current connectors. These connectors are designed to be utilised in temporary or permanent power distribution applications. Powersafe connectors are primarily designed to allow for safe and efficient connection of power cables between the power source and appliance.

Powersafe connectors have been tested and certified to ensure the product integrity. The main features are current ratings up to 800Amp, keyed and colour coded design to prevent connection errors, watertight construction up to IP67 and protective devices to prevent electric shock.

Harmonised, National and Manufacturers Standards

There is no European harmonised specification specific to this design of connector or 800amp rated single pole connectors. To ensure the safety and operational characteristics of the Powersafe design, Phase 3 Connectors Ltd, implemented a test program based on recognised European Harmonised and National test specifications of similar devices, utilising recognised test methods.

EN60309-1 1999
Plugs, socket- outlets and couplers for Industrial purposes.

BS5550 7.5.4-1981
Cinematography, specification for single pole high current plugs and socket connectors.
